Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The original patent has not been surrendered, nor is there a statement as to it being lost.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 54-60 are rejected under 35 U.S.C. 102(b) as being anticipated by DD148,997.

With respect to claim 54, DD '997 teaches a wafer for forming an integrated circuit thereon, the wafer comprising (see figure 1 and the English translation of DD '997):

a main surface on which an integrated circuit is to be formed;
a substantially circular contour portion surrounding said main surface;
a curved notch 3,4,5,6 formed in said circular contour portion; and
connecting portions defined between said circular contour portions and said curved notch, wherein said connecting portions are chamfered in a plane parallel to said main surface.

The limitation "positioning said wafer by rotating wafer..." is a process limitation and is given no weight in the determination of the device or structure claim.

With respect to claim 55, the limitation "positioning said wafer by using photoelectric elements..." is a process limitation and is given no weight in the determination of the device or structure claim.

With respect to claims 56-60, DD '997 further teaches the thickness of an outer peripheral part 2 of the wafer is chamfered. How the thickness of the outer peripheral part of the wafer is chamfered is not given weight in the determination of the device or structure claim. The methods for chamfering the connection portions and positioning the wafer are not given weight in the determination of the device or structure claim.

1. Claims 45-53 are rejected under 35 U.S.C. 251 as being broadened in a reissue application filed outside the two year statutory period. The addition of process claims 45-53 is considered as broadening of the invention because there were no process claims present in the original patent. The process claims 45-53 are directed to same subject matter as the non-elected claims of the original application and the applicant has failed to file a divisional application for the non-elected claims. See *In re Weiler, et al.* and *Ex parte Wikdahl*, 10 USPQ2d 1546 (Bd. Pat. App. and Inter. 1989). A claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would have infringed the original patent. A claim is broadened if it is broader in any one respect even though it may be narrower in other respects.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Long Pham whose telephone number is 571-272-1714. The examiner can normally be reached on M-F, 7:30AM-3:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on 571-272-1705. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
